Pangborn Memorial Airport
Taxiway A Realignment Project

The Chelan Douglas Regional Port Authority will be seeking bids on February 24, 2022 for the Pangborn Memorial Airport Taxiway A Realignment project. The project will be constructed in phases over the next two years. This project will realign and reconstruct 5,000 feet of the parallel taxiway, along with 2,000 feet of connecting taxiways. Taxiway A is currently 50 feet wide, while FAA design standards require a full-strength pavement width of at least 75 feet for the design aircraft, the Bombardier DH8 Q400 (Q400), operated by Alaska Airlines. Much of the pavement within the project limits is deteriorating due to age and loading. The

work will involve clearing and grubbing, grading, pavement removal and replacement, edge lighting, utility and storm drainage improvements, airfield signage, and pavement markings. The current engineer's estimate, provided by TO Engineers, is \$17.6 million. The Airport has applied for FAA grant funds which will fund 90% of the project, and if successful, work will begin in August 2022 and be completed in 2023.

For more information on the project please visit <https://www.cdrpa.org/bid-opportunities> on February 24, 2022 or contact Trent Moyers, Director of Airports or Stacie de Mestre, Public Works & Capital Projects Manager at 509.884.4700.

About the CDRPA: The Chelan Douglas Regional Port Authority is the first of its kind in Washington by functionally consolidating two county-wide port districts into one operating entity. With the mission to "Work Together to Enhance the Economic Vitality of North Central Washington", the CDRPA acts as the principal economic development agency for Chelan & Douglas Counties.
